Businessman with long gap	Good with documentation
15+ year gap	Case-by-case

STRENGTHS & WATCH-OUTS

Strengths: fully English-taught, British-accredited, international environment, smaller class sizes, Budapest is comparatively affordable among European capitals.

Watch-outs: private institution — tuition runs well above Hungarian public universities; limited engineering/science/medicine/agriculture options; primarily a business & management specialist, not a generalist university.

BEST PROGRAMMES FOR PAKISTANI STUDENTS

Agriculture: MSc Crop Production, MSc Plant Protection, Agriculture Engineering

Health: Public Health, Nursing, Physiotherapy

Engineering: Mechanical, Electrical

Business: International Business Economics, Management

Medical: Medicine, Dentistry, Pharmacy

WHY DEBRECEN STANDS OUT

Genuinely broad faculty range (rare combination of Medicine + Agriculture + Engineering + Business at one public university), large existing international community (140+ countries), and real scholarship pathways (Stipendium Hungaricum) that can cover tuition + stipend for qualifying applicants.

Quote Carefully — Corrections & Safeguards

CORRECTIONS & SAFEGUARDS — DO NOT OVERSTATE

- This deck covers only 2 of Hungary's 40+ higher-education institutions (IBS Budapest and University of Debrecen) — present these as strong starting options, not as the full extent of what Hungary offers.
- **Currency mismatch:** IBS Budapest's fees are quoted in EUR; University of Debrecen's are quoted in USD in the source material — always confirm which currency a quoted figure is in before presenting it to a client, and convert consistently.
- IBS is a **private** institution with tuition well above Hungarian public universities — do not present its pricing as representative of Hungary generally.
- IBS's British Accreditation Council (BAC) status is valid until **March 2027** — reconfirm current accreditation status for any intake beyond that date.
- The English requirement language notes "has become stricter for recent intakes, especially for Master's programmes" — always verify the current-cycle requirement directly with the institution rather than relying solely on the tables in this deck.
- Medicine/Dentistry at Debrecen use entrance examinations (Biology/Chemistry/Physics, written + oral) — do not present admission as guaranteed by meeting the base language requirement alone.
- Study-gap and "chances" tables reflect a counselor's practical assessment, not official university policy — neither institution publishes an official maximum study gap; present these as informed guidance, not guarantees.
